

First Investors Funds

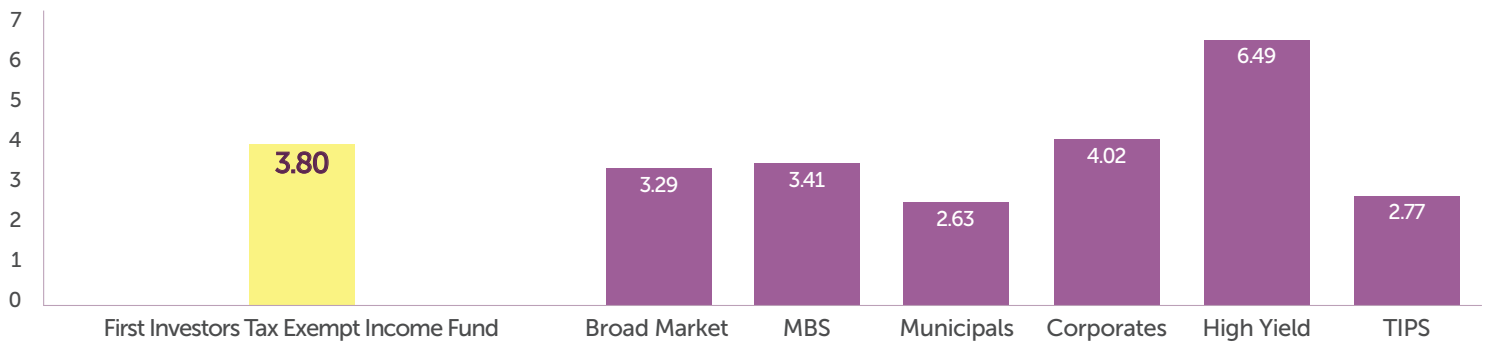

Now is the time for Munis

★★★★ Morningstar Rating™¹

Class A shares rated 4 overall stars by Morningstar among 261 U.S. Muni National Intermediate funds for the period ended 6/30/2018 based on risk-adjusted performance.

Today's income-starved investors are challenged with low interest rates, higher tax rates and greater overall risk. Consider a municipal bond fund — an important diversifier that provides little correlation to stocks² and offers the unique advantage of tax-free income and high credit quality among fixed income funds. First Investors Tax Exempt Income Fund offers an attractive, tax-free yield using a top-down, bottom-up investment approach.

Fixed Income Yields (%) as of 6/30/2018³

First Investors Tax Exempt Income Fund offers:

High credit quality – bonds with these characteristics frequently offer highly attractive risk/reward trade-offs.

Industry leading yield – by actively managing interest rate risk and credit risk—the two major risks associated with bond investing—the Fund seeks to provide stable income while mitigating volatility.

Tenured, time-tested team – with more than 30 years of experience navigating the fixed income markets, Clark Wagner, CIO is co-Portfolio Manager of the Fund. He is one of the longest tenured muni managers in the financial services industry⁴.

Learn how to manage your clients' fixed income exposure while providing downside protection by considering the **First Investors Tax Exempt Income Fund (Class A- FITAX; Advisor Class - FITDX)**.

¹ For the three-, five- and 10-year periods, respectively, the Fund was rated 4, 4 and 4 stars among 261, 233 and 154 funds in the U.S. Muni National Intermediate funds category for the time period 6/30/18. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
