Investment Objective and Strategy

The Fund seeks total return and, secondarily, capital preservation. The Fund will seek to achieve its investment objective by investing in a broadly diversified portfolio of common stocks of any market capitalization while also investing in derivatives to help manage investment risk. Under normal circumstances, the Fund will invest at least 80% of its net assets (plus any borrowings for investment purposes) in equity securities of U.S. issuers and investments that provide exposure to such securities, including exchange-traded funds. The Fund defines U.S. issuers to include: (1) issuers that are incorporated or headquartered in the U.S.; (2) issuers whose securities are principally traded in the U.S.; (3) issuers with a majority of their business operations or assets in the U.S.; or (4) issuers who derive a majority of their revenues or profits from the U.S. To a lesser extent, the Fund also may invest in the equity securities of foreign issuers, including emerging market issuers. The Fund may engage in active and frequent trading which may result in high portfolio turnover.

Current performance may be lower or higher than the performance data quoted. Performance of share classes will differ because each class is sold pursuant to different sales arrangements and bears different expenses. For performance data current to the most recent month-end call 800 524 2803 or visit foresters.com. Returns may reflect waivers or reimbursements of certain expenses.
