\*\* Measured against the Fund's benchmark

## Investment Objective and Strategy

The Fund seeks a high level of current income. The Fund is a "fund-of-funds" and seeks to achieve its investment objective by investing primarily in a combination of underlying funds that currently exist or may become available for investment in the future for which Foresters Investment Management Company, Inc. acts as the investment adviser ("Underlying Funds"). The Fund may also invest in unaffiliated funds, which are also considered to be Underlying Funds. The Fund will have exposure to a variety of fixed income securities, floating rate securities, municipal securities, equity securities, and other instruments by investing through a combination of the underlying Funds. The Fund will primarily invest in underlying income Funds.

## Growth of \$10,000 Investment

— Strategic Income Fund \$10,892

The Growth of \$10,000 Investment graph shows cumulative return of an initial investment of \$10,000 from 04/3/2013 to 12/31/2018. Figures include reinvestment of capital gains and dividends, but do not reflect the effect of any sales charges or redemption fees, which would lower these figures. The illustration is not intended to imply any future performance of the Fund. Past performance is no guarantee of future results.

## Annual Performance before sales charge (%) (all distributions reinvested)

	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	YTD 2018

<b>Benchmark</b>	0.05	0.05	2.08	2.61	1.87

\*The Since Inception average annual total returns shown for the Class A, Advisor Class Shares and the benchmark are for the period since the commencement of those classes on 04/03/2013.

The performance data quoted represents past performance. Past performance does not guarantee future results. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. Performance of share classes will differ because each class is sold pursuant to different sales arrangements and bears different expenses. For performance data current to the most recent month-end call 800 524 2803 or visit foresters.com. Returns may reflect waivers or reimbursements of certain expenses. Absent these waivers or reimbursements, returns may be lower.

## Fee Structure

Shareholder fees (fees paid directly from your investment)		
	Class A	Advisor Class
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)	4.00% <sup>1,2</sup>	None
Maximum deferred sales charge (load) (as a percentage of the lower of purchase price or redemption price)	1.00% <sup>3</sup>	None

<sup>1</sup> Effective June 12, 2017, the maximum sales charge on Class A Shares was changed from 5.75% to 4.00%.

<sup>2</sup> Due to rounding of numbers in calculating a sales charge, you may pay more or less than what is shown above.

<sup>3</sup> A CDSC of 1.00% will be assessed on certain redemptions of Class A shares that are purchased without a sales charge

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)		
	Class A	Advisor Class
Management Fees	0.05%	0.05
Distribution and Service (12b-1) Fees	0.30%	None
Other Expenses	0.21%	0.16%
Acquired (Underlying) Fund Fees/Expenses	0.65%	0.65%
Total Annual Fund Operating Expenses	1.21%	0.86%

## Glossary of Terms

Multisector-bond portfolios seek income by diversifying their assets among several fixed-income sectors, usually U.S. government obligations, U.S. corporate bonds, foreign bonds, and high-yield U.S. debt securities. These portfolios typically hold 35% to 65% of bond assets in securities that are not rated or are rated by a major agency such as Standard & Poor's or Moody's at the level of BB (considered speculative for taxable bonds) and below. The BofA Merrill Lynch U.S. Broad Market Index tracks the performance of US dollar denominated investment grade debt publicly issued in the U.S. domestic market, including U.S. Treasury, quasi-government, corporate, securitized and collateralized securities. Indexes are unmanaged and do not reflect the performance of any particular security. Alpha is a measure of performance on a risk-adjusted basis. Beta measures market volatility; a benchmark generally has a beta of 1.0; an investment with a beta under 1.0 is considered less volatile. R-Squared measures the percentage of a fund or security's movements that can be explained by movements in a benchmark index. Standard Deviation is a statistical measure of the historical volatility of a mutual fund or portfolio; the higher the number the greater the risk. Sharpe Ratio measures reward vs. risk; a higher number is more favorable. Portfolio Turnover is reflective of quarter end.
